**Incident Control Systems, LLC now offering contract computerized fabric cutting services.**

*New Bedford, MA., September 18, 2008* - Incident Control Systems, LLC is pleased to announce the offering of Contract Computerized Cutting Service. Due to recent growth for the company, ICS has made several capital investments in the form of new machinery. The company has recently purchased an Eastman M9000 Digital Cutting System.

The M9000 is a static table cutting system capable of marking, cutting, drilling, and punching any fabric material at speeds of up to 60 inches per second. ICS will offer contract cutting services that include dry fabric cutting, pre-preg fabric cutting, ply cutting, composite cutting and kitting. The company's facility also has on-site material storage, cold and hot. In addition to cutting services, the company plans to offer its engineers to assist in design services. General Manager Steve Monette was quoted "These new capital investments can be attributed to the company's hard work and growth over the past year. We remain dedicated to our customers and are pleased to offer this new service to our existing and new customers". Anyone interested in contract cutting service are asked to contact ICS for price quotes, lead times, and additional services.

Incident Control Systems, LLC is a firm dedicated to the design, manufacture, and integration of advanced composite armor systems for ground, air and marine platform.
