

C-SERIES BALLISTIC SHIELDS

**4"x16" Ballistic Viewport
with Cleargard® Polyurethane**

**Boltless Assembly Eliminates
Secondary Projectiles**

**Optional LED
Lighting System**

**100% Aramid Construction Reinforced
with Rigid Thermoplastic**

The ICS C-Series Ballistic Shield was designed and developed by engineers with a long history in shield innovation. Our technology has led the ballistic shield market for over 10 years. We are the first to develop and build shields with a lighting system under the viewport and eliminate metallic parts, seen in older designs.

Utilizing our state of the art Research and Development department, we are the first to develop and deploy a monolithic polyurethane shield viewport that reduced weight and increased vision clarity.

With over 2000 shields in the field today using our technology, we continue to be the leader in reducing weight, increasing ballistic capabilities and streamlining function in all of our products.

Options

Available sizes: 20"x36" 24"x36"
Call for custom sizes up to 60"x96"
LED with NiCaD Battery (recharger included)
